

SCIENTIFIC POSTER COMPETITION GUIDELINES

Registration and Poster Submission Instructions

1. To register, please visit the following link based on your category:
 - General participants: <https://bit.ly/poster-register>
 - Students: <https://bit.ly/poster-register-student>
2. After registration, submit your poster along with proof of payment through the following link: <https://bit.ly/InAsPoster>

Ensure that your poster complies with the requirements outlined in the guidelines.

1. Format for Poster Submission

- The poster board should be 84,1 cm x 59,4 cm (A1 sheet; **layout: portrait**). The space between the content of an element and the border of that same element is 2,5 cm or less. Please, use adequate letter type and size to ensure good readability. Well-designed figures, graphs, and tables will generally increase the attractiveness of your poster.
- Text must be written in English or Bahasa Indonesia. Use short sentences, simple words, and bullets to illustrate your points.
- Text and graphics should be easily readable if the poster is printed out on an A1 sheet
- Cambria font used in the entire poster.
- Suggested font sizes are (for the A1 format):
Title Research: 70 pt (bold); Author: 50 pt; Affiliation: 40 pt; Section title: 50 pt (bold); Section paragraph: 30-40 pt; Figure-chart-table title bold: 25-35 pt.
- Please include the organizer's logos on your poster (Check the example). The logos can be downloaded by following the link below

2. The General Structure

- **Title**
The title should attract potential viewers. If possible, institute logos or affiliations should be minimized in size and put in the lower corner of the poster, or next to the title.
- **Author(s) name(s)**
List the first author's last name, first name, middle initial, and then the first name, middle initial, and last name of each co-author. Underline the name of the person who will be presenting the poster.
- **Author's affiliation**
Include your department or program and institution. If your co-authors have different affiliations, place a superscript number after each author's name and a corresponding superscript number before each author's address. The presenting author's name should be underlined.
- **Introduction**

Get your viewer interested in the issue or question while using the absolute minimum of background information and definitions. Put the objectives of your study at the end of your introduction.

- **Objective**

Research objectives describe what your research is trying to achieve and explain why you are pursuing it. They summarize the approach and purpose of your project and help to focus your research.

- **Methods**

Be short, but precise. State what study design you used and define your study population. Provide a case definition, if applicable. Mention statistical, laboratory, and other methods that were used.

- **Results/Discussion**

Briefly provide descriptive results (response rate, age, and sex distribution). Present data that more specifically address the hypothesis and refer to supporting charts or images. Tables and graphs should stand on their own. Remove all non-essential information from graphs and tables (data curves not discussed by the poster; excess grid lines in tables).

- **Conclusions and recommendations**

Comment on the main results and discuss why they are conclusive and interesting. Include your recommendation for the next research.
